To determine the proper adjustment of my compass for subdividing this Township I began at the corner to Townships 9 N between ranges 5 and 6 East and run North on a blank line along the east boundary of section 31

Variation 11°30 East

40.08	Intersected the quarter sec corner
80.10	Intersected the corner to sec 25 and 30
	To retrace this line or run parallel thereto my compass must be adjusted to a Variation of 11°30 East
	From the corner to Townships 9 North between ranges 5 and 6 East I run west on a blank line along the South boundary of Section 36
	Variation 11°30 East
37.82	To a point 14 lks north of quarter sec corner
79.64	To a point 28 lks north of corner to Secs 31 and 36

General Description.

The quality of land in this Township is considerably above the common average. There is a very fair proportion of 1st rate land, the balance is most all good 2nd rate soil. The timber is very scarce there being but few scattering trees on the creek in the South East part of the township. There is plenty of good fresh water in the Township

We hereby certify that we assisted John B. Sire Deputy Surveyor in subdividing Township Number 11 North Range 5 East of the Sixth Principal Meridian and that said Township has been in all respects to the best of our knowledge and belief well and faithfully surveyed and the corners set according to the instructions furnished by the Surveyor General
