Beginning at the meander Cor on the North bank of the River 8.40 chains South of the Cor. to secs. 23 & 24.

Va. 13° E.

To ascertain the distance across the North channel of the River to the North bank of the Island I cause a flag to be set on the North bank of the Island and in line between Secs. 23 and 24. From the meander cor. on the North bank of the River I run East 5.00 chains to a point from which the flag on the Island bears South 29° West which gives for the distance across the North channel of the River 9.02 chains to which add 8.40 chains makes 17.42 chains to the North bank of the Island from the Cor. to Secs 13, 14, 23 and 24. Set a post with charred end 3 x 4 4 ft 12 in deep in place of flag for meander cor. on North bank of Island from which

A cottonwood 4 in diam bears S 27 E 69 lks dist
A cottonwood 3 in dia bears S 15 West 72 lks dist

Thence I continue

South on a line between Secs 23 & 24

Across the Island to the South bank 8.18 chains to which add 17.42 makes 25.60 chains South of the Cor. to Secs. 13, 14, 23 and 24 where I set a post 3 x 4 in 4 ft with chared end in 12 in deep for meander Cor. on the South bank of the Island from which

A cottonwood 4 in dia bears N 27 E 18 lks dist
A cottonwood 4 in dia bears N 8 W 23 lks dist

From this meander post I meander around the Island as follows

Township 20 N. R. 6 East of the 6th Principal Meridian N. D.

General Description

The quality of the land in this Township is considerably above the common average. There is a fair proportion of good bottom land, chiefly situated on the Elkhorn River which is not a navigable stream for any craft larger than the Indian Canoe. The uplands are generally rolling 1st and 2nd rate lands and well adapted for cultivation. Timber none, except on the banks of the Elkhorn river which affords only a small portion for farming purposes, being very scattering and principally Cottonwood of a scrubby character. There are no quarries of stone, or signs of stone coal in any portion of this Township.
