Township 29 N. R. 6 West of 6th Prin. Mer.

General Description
The land in this Township is mostly of 2nd rate quality and has a gently rolling surface. It is well adapted to farming purposes. There is a scarcity of Timber, I found only scattering Cedar, Cottonwood and Elm trees on the banks of a Branch running N. W. through Sec. 32. I found sandstone and limestone, in the Western tier of sections, of an inferior quality and not suitable for building purposes.

Land gently rolling Soil 2nd rate

August 21st 1863.

General Description

The land in this Township is mostly rolling prairie of good 2nd rate quality. The Southern portion of the Township has a gently rolling surface, and is well adapted to farming. The northern portion is very rolling some parts are broken and hilly, and apt to wash when cultivated. There is some marshy places in Sections 25. 35 and 36. The water in and near the center of these marshes is about 10 in deep, and by proper drainage can be made fit for cultivation. The Township is well watered by Verdigris Creek and other Spring branches of good clear water.

Timber. Chiefly Bur. oak. Elm ash cottonwood Cedar and Willow. exists along the banks of the Streams and ravines.

There is some impure limestone of an inferior quality near Verdigris Creek.

General Description

The quality of the land in this Township is below the common average

The uplands are generaly rolling or broken and poorly adapted to cultivation

There is no timber of any account in the Township (with the exception of a very few small groves in the interior) Except what is found on section 6 among which is some very fine Red Cedar but it extends but a short distance from the river

Boulders and sandstone are distributed very generaly over the hills and Soapstone is found in various places along the streams

There are no settlements in the Township

General Description

The quality of the land in this Township is less than the common average. There is a fair proportion of bottom land some of which (adjoining the Bluffs) is first rate the balance is second rate The uplands are too broken as a general thing to be valuable

There is no timber except some small cottonwood and willow along the bank of the river

The town of Neshonok situated in this Township has been laid out about two years; has a large and commodious Hotel and 15 or 20 other houses also one sawmill and is accessible for steamboats at all times during the summer season by means of the Mississippi river The Neshonok river passes through the west side of this Township and is a wide
