General Description.

The quality of land in this Township is good and well adapted to farming. There is some 1st rate bottom land on both sides of the Elk Horn River.— This stream runs in a S. E. direction through the Northern tiers of secs. The average width is 150 links. The water, pure and clear, runs through a sandy bed.— The fish in this River are good and plenty.—

The uplands are rolling and of 2nd and 3rd rate quality. A small brook, 5 links wide, runs through the S. E. part of the Township and empties into the Elk Horn.— Another small stream of good water runs into the Elk Horn in sec 6.—

There is some good timber along the banks of the Elk Horn. It is chiefly Cottonwood, Ash, Bur Oak, Willow,

Boxelder and Elm
No stone or mineral in the Township
Some sixty settlers are now on the way up
this River to take homesteads.-

General Description.

The land in this Township is high rolling and mostly of 2nd and 3rd quality. The Southern portion of it is well adopted to farming. As a whole it is very good for stock raising.

Elk Horn River runs through Secs. 31 and 32. It is about 150 ft. wide and 2 feet deep. — The timber along this Stream is of good quality, and consists of Cottonwood, Ash, Willow and some Box Oak.

No stone or mineral within this Township.

Gunral discription

This township has some very good land and is well adapted to farming. It is well watered by small spring branches of excellent water

There is some good timber consisting of Oak, Ash, Elm, Cottonwood and Cedar in the ravines and along some of the branches, In the northern part of this township is found large portions of sand; also some chalky limestone of an inferior quality

The stone is too soft to be used for corner monuments. The hill tops are covered with pebbles among which is found some fine specimens of moss agate
