GENERAL DESCRIPTION.

The character of the land in this Township is varied, consisting of mountainous, level and rolling country.
It is well watered by Niobrara and Running Water Rivers.
Timber of Cottonwood, Willow and Wild Cherry is found along the banks of the Rivers, and in these portions of the Tp, the land is well adapted to agriculture.
Pinechgrass and Sagebrush are abundant throughout the Tp.
The soil is 2nd and 3rd rate.

General Desenption

This is a good Township. The surface generally is gently rolling with smooth even slopes to drains. The soil is a mixture of clay and dark sandy loam of good depth and quality. There is no living water except small lake in Section 29. There is a ridge of hills in Sections 14, 15, 22 & 23 covered with a good quality of Sandstone for building purposes. The Township is well adapted

to farming and the growth of small grains.

General Description

This is a good township of land for Agricultural purposes. The surface is gently rolling, The banks of draws are smooth with gradual slopes except in the extreme North of Township where banks are more precipitous. There is no living water except the small Spring branch in Sec. 1 & 2

The soil is a clay and sandy loam of good depth and quality There are a few scattering pine trees along banks of Ravines in the

Northern part of the township. The Tp produces a good growth of Buffalo, Bunch and Blue joint grass. And is well adapted to the growth of small grains
