Survey Commenced June 12th 1883
Survey Completed June 1883

Preliminary to commencing the survey I ran a due Blank line along the E. boundary of sec 36 at 40.03 chains found the 1/4 sec cor and at 79.98 chs found the cor to Secs 30 and 31 on Rs. 5 E and 6 E. N. which is a mound of rock 3 1/2 ft high 4 1/2 ft base with stones in mound marked with 6 notches on each edge. Thence I ran West on a Blank Line on the South boundary of sec 36

Dated. Sept 14. 1882

Survey
Commenced, July 2nd 1883
Completed. July 9th 1883

Subdivisions. T. 32. N., R. 33 W.

On the night of July 1st 1883, I took an observation on the Star Polaris, in accordance with instructions contained in the manual of Surveys, and drove pickets on the line thus established.

Survey commenced July 3d 1883, with a Burley Transit instrument, with 6 in. needle.

Before commencing this Survey I test my compass on the line established last night, and find it correct.

Mon

Preliminary to commencing this survey I run South on a blank line, along the East side of sec. 36, and at 40.08 found the ¼ sec. cor. and at 80.10 found the ~~S.~~ P. cor.
As I had previously run the South boundary it was not retraced by compass, will therefore run the same lines as the exterior boundaries, and the chaining practically agrees.

I commenced at the cor. to secs. 1, 2, 35, and 36, on the South boundary of the township, and run,
