Field Notes of the Survey of the Exterior Boundaries of Townships 17, 18, 19 and 20 North of Ranges 41 and 42 West of the 6th P.M. In the State of Nebraska

Executed by

Enos F. Gray, Deputy Surveyor, under joint contract No. 65, wherein Enos F. Gray and John A. Hays, are joint Contractors, bearing date July 11th 1872

Survey

Commenced October 2nd 1872
Completed October 10th 1872

T. 17 N., Between ranges 41 and 42 W. 6th P.M.

Chains	
	Begin at the post, the established, Standard Corner, to Townships 17 North, ranges 41 and 42 West of the 6th Principal Meridian, on the fourth Standard Parallel North / the post Standing and the mound and pits remaining,
	I run,
	North, on the range line, between Sections 31 and 36,
	Variation by Gurley's improved Solar compas 15° 0' East
40.00	Set a post, deposited a pint of charcoal and raised a mound, with pits, as per instructions, for 1/4 Sec. cor
80.00	Set a post, deposited a pint of charcoal and raised a mound, with pits, as per instructions, for corner to Sections 30, 31, 25 & 36 Land level or gently rolling, Soil Sandy, 3d rate, produces good bunch and rye grass, good for grazing

T. 17 N. Between ranges 41 and 42 W. 6th P. M.

Chains	
	North, between Sections 25 + 30 Va 15° 00' East
40,00	Set a post, deposited a pint of Char Coal and raised a Mound, with pits, as per instructions for corner to 1/4 Section
80,00	Set a post, deposited a pint of Char Coal and raised a Mound, with pits, as per instructions for corner to Sections 19, 30, 24 and 25
	North, between Sections 19 and 24 Va, 15° 00' East
40,00	Set a post, deposited a pint of Char-Coal and raised a mound, with pits as per instructions, for 1/4 Sec, Cor,
80,00	Set a post, deposited a pint of Char Coal and raised a Mound, with pits, as per in-structions, for corner to

T. 17 N. Between ranges 41 + 42 W. 6th P. M.

Chains	
	Sections 18, 19, 13 and 24 Land gently rolling, Soil Sandy, 3d Rate, Produces good bunch grass and is good for grazing
	North, between Sections 13 and 18 Va, 15° 05' East
40,00	Set a post, deposited a pint of Char Coal and raised a Mound, with pits, as per instructions, for 1/4 Sec, Cor,
80,00	Set a post deposited a pint of charcoal and raised a mound, with pits, as per instructions for corner to Sections 7, 18, 12 and 13 Land gently rolling, Soil Sandy and 3d Rate, Produces good bunch and rye grass

T. 17 N. Between ranges 41 and 42 W. 6th P.M.

Chains	
	North, between Sections 7 and 12 Va 15° 09' East
40,00	Set a post, deposited a pint of char Coal and raised a mound, with pits, as per instructions for 1/4 Sec. Cor.
80,00	Set a post, deposited a pint of char Coal and raised a mound, with pits, as per instructions. for Corner to Sections 6, 7, 1 and 12 Land rolling, Soil 3d rate, produces good bunch and prairie grasses
	North, between Sections 1 and 6 Va 15° 09' East
40,00	Set a post, deposited a pint of char coal and raised a mound, with pits, as per instructions. for 1/4 Sec. Cor.
80,00	Set a post, deposited a pint

78.40	To the established corner to Townships 17 and 18 N. ranges 41 and 42 West — Land rolling, Soil 3rd rate produces good bunch and prairie grasses
	October 2d 1872

General Description

This Township (T 17 N. R 41 West) contains no timber, Stone, or water upon its surface and the Soil, I think is too Sandy and dry for cultivation, irrigation being impracticable,

The land, of this Township, is uniform in its character, rolling surface, 3rd rate soil producing good bunch and prairie grasses, and is well adapted to grazing, there being good water West and South West of the Township, sufficiently near, from which to supply herds

79.90	Intersect the 5th Standard North Parallel at a point 16 chains and 58 links West of the Standard quarter Section Corner, established on the South boundary of Section 32 Township 21 N. Range 41 West, on said 5th Standard Parallel North, at which point of intersection, I set a post, deposited a pint

41

of clear coal and raised a mound with pits as per instructions for closing corner to township 20 North Ranges 41 and 42 W upon said Standard Parallel

Except the bottom noted the land is rolling, soil sandy, 3rd rate, produces good bunch grass

The bottom land is 1st rate and good for agriculture sufficiently dry for cultivation and produces good rye and prarie grasses

October 5th 1872

General Description

This Township (T. 20 N. R. 41 W.) is generally a rolling surface and sandy soil, too dry

42

and sandy for cultivation but produces good grass and is available for grazing.

There probably are bottoms in the interior of the township such as noted on line, these bottoms are generally of good rich soil, and first rate agricultural land and I think in these bottoms good water might be obtained from wells at no very great depth

General Description

This Township (T. 19 N. R. 42 W) is void of any notable features, no water, stone or timber, its surface is uniformly rolling and its soil sandy Its vegetation, Buch grass is good for grazing and water is sufficiently near, at the Blue River, on the west, from which to supply herds

The business of farming could not, I think be successfully carried on upon this kind of land

Chains	
	From the Corner to Townships 19 and 20 N. Ranges 42 and 43 West. Due North, on the range line between sections 31 and 36 Var. 15° 09' East
40.00	Set a post, deposited a pint of charcoal and raised a mound with pits, as per instructions, for 1/4 Sec. Cor

North, between Sections 1 and 6 Var. 15° 09' East

40,00 Set a post deposited a pint of charcoal and raised a mound, with pits, as per instructions for 1/4 Sec. cor.

79,70 Intersect the 5th Stand and Parallel N. at a point 13 chains 10 links west of the Standard quarter section Corner, established on the South boundary of Section 32 Township 21 North, range 42 West, on said 5th Standard Parallel

T. 20 N. Between Ranges 42 and 43 W. 6th P. M.

Corners

North, at which point of intersection, set a post, deposit a spirit of Charcoal and raised a mound, with pits, as per instructions, for closing corner to Township 20 North of ranges 42 and 43 West, on said 5th Standard Parallel North

Land rolling, said 3d April October 5th 1872

General Description

The township (T 20 N, R 42 W) is destitute of Stone, Timber and water, its surface is mostly rolling and produces good bunch grass and is good for grazing. There are a few bottoms or basins in the township of good soil and very fair agricultural land and I think good water can be procured in these bottoms, from wells at a reasonable depth

List of Names

A list of the names of the individuals employed to assist in running, measuring, or marking the lines and corners described in the foregoing field notes of Townships No 17, 18, 19 and 20, North in ranges No. 41 and 42 West of the 6th Principal Meridian, showing the respective capacities in which they acted; Orson Harris, Chainman; Arthur L. Stahl, Chainman; Casper Yong, Axeman; J. H. Bowman, Flagman

We hereby certify that we assisted Enos F. Gray, deputy surveyor

in surveying the exterior bound=
=aries of Townships Nos. 17, 18, 19 and 20
North in ranges Nos. 41 and 42
West of the 6th Principal Meridian,
and that said Townships have been
in all respects, to the best of our
knowledge and belief, well and faith=
=fully surveyed, and the boundary monu=
=ments planted according to the instructions
furnished by the Surveyor General

Approved Henry Clayman
Arthur L Stahl Chairman
Casper Gong. Alderman
D H Bozard Alderman

Subscribed and sworn
to by the above named
persons, before me, Clerk
of the District Court
for the County of Cheyenne
in the State of Nebraska
this 2d day of November 1872

L Connell
Clerk of the District
Court for Cheyenne
County Nebraska

I, Enos F. Gray, Deputy Surveyor, do
Solemnly swear that in pursuance of
a joint Contract, wherein Enos F. Gray
and Patrick Hays are joint Con=
=tractors with E. E. Cunningham United
States Surveyor General for
the District of Nebraska and Iowa,
bearing date the 11th day of July 1872
I have well, faithfully, and truly,
in my own proper person, and
in strict conformity with the
instructions furnished by the
Surveyor General, the Surveying
Manual, and the laws of the
United States, Surveyed all
those parts or portions of Exterior
lines as are represented in the
foregoing field Notes as having
been Surveyed
under my directions; and I do
further Solemnly swear that all
the Corners of said Surveys have
been established and perpetuated
in strict accordance with the
Surveying Manual and printed
instructions, and that the foregoing

are the true and orignal
field notes of such survey
Enos F. Gray

79.35	To the established corner to townships 17 and 18 North Ranges 43 and 44 West. Land rolling, soil 3rd rate vegetation bunch and rye grass and a little sage brush

General Description

This township (T. 17 N. R 43 W.) contains about five sections, in the S.W. corner of the same of first rate agricultural land, this is the low bottoms of the North Fork of Platte River, the remainder of the township, rises moderately from South to North and is generally of a rolling surface, its soil is generally sandy and too dry for

cultivation, and I think irrigation is not practicable but this land produces good Grasses and is good for grazing and though there is no water visible in the township, upon the surface, there is water sufficient near from which to supply herds, as the Blue River on the East of the township

General Description

The surface of this Township (T 19 N. R. 43 W) is uniformly rolling and its soil sandy and poor, It produces however good bunch grass and it being watered by the "Blue River" in the S. W. Corner is good for grazing

There is one or two sections on the "Blue River" of bottom land, which is good agricultural land

The "Blue River" is a brisk running creek of 20 links in width and is fed by numerous springs of pure cold water, rising along its margin

General Description

In this Township (T 17 N. R 14 W) there is some good agricultural

land, The river bottoms in the South part of the township is the best kind of farming land, also the bottom of the brook noted in the north part of the township is good farming land, in the Central portion I think there are other brooks and good agricultural bottoms, there are croppings of lime stone ledges to be found in many places along the Northern line of this township

The surface is generally rolling and rising from the river bottom to

to the north

General Description

In this township (T. 19 N. R. 14 W.) there is some good agricultural land along the "Blue River" consisting of its bottom, of about 40 chains right angle width nearly or quite all of which is tillable. This stream takes its rise not far north of this township and in this township is greatly increased in size, aside from the spurs & sand hills noted on the south line the remainder of the township is of

rolling surface, and produces good bunch grass and is well adapted to grazing

Transcribed 64,00 Enter low bottoms of the North Fork of Platte River, which is reached by a very graded descent, bears S. and E. N. W. 79,35 the established corner to townships 17 and 18 North, Ranges 45 and 46 West. Land, except the bottom noted, is somewhat broken and bears heine stone, soil 3d rate. The bottom noted is dry enough for cultivation and 1st rate soil

October 23rd 1872

General Description

The North Fork of Platte River, runs through this township (T. 17 N. R. 45 W.) almost diagonally, on each side of which is a bottom

of from one half mile to two miles wide of first rate agricultural land, in other portions of the township heine stone & bounds, inferior in quality, but good for building purposes

The river in this township is from 40,00 to 50,00 chains in right angle width and in the months of June, July and august is deep enough to float ordinary river steamboats It is however a very rapid stream with a bed of quick sands

October 26th 1877

General Description

This Township (T. 20 N., R. 45 W.) is mostly composed of sand hills, low hills of drifted sand being the character of the surface, in some places these hills are destitute of vegetation and in others the vegetation is bunch grass or sand cherry shrubs, the roots of which are useful for fuel. There are some basins or bottoms in the township but the soil is generally impregnated with alkali so that the soil in these bottoms may be classed as D. Rate

October 28th 1872

General Description

This Township (T. 17 N. R. 46 W) contains some good farming land on and near the North Fork of Platte River, which runs through the N. E. corner of it. From the river bottom on the north the land rises southward gradually and the Southern part of the Township is somewhat broken and bears lime stone in the S. W. corner is a little plateau land good for agriculture, the remainder of this township is good for grazing, good water being sufficiently near for that purpose

T. 18 N., Between Ranges 46 and 47 W., 6th P.M.

Solemnly Swear that in pursuance
of a joint Contract, wherein Enos
F. Gray and John A. Hays are joint
Contractors with E. E. Cunningham
United States Surveyor General for the
District of Nebraska and Iowa,
bearing date the 11th day of July 1872
I have well, faithfully, and truly
in my own proper person, and in
strict Conformity with the instructions
furnished by the Survey or General,
the Surveying manual, and the
laws of the United States, Surveyed
all those parts or portions of exterior
lines as are represented in the foregoing
field notes as having been surveyed
under my directions; and I do further
Solemnly swear that all the Corners
of said Surveys have
been established and
perpetuated in strict
accordance with the Surveying
manual and printed
instructions, and that

the foregoing, are the true and original field Notes of such Survey

Enos F. Gray
Deputy Surveyor

Subscribed by said Enos F. Gray, deputy surveyor and sworn to before me Clerk of the District Court for the County of Dodge, State of Nebraska, this 30th day of November 1877

J. J. Hawthorne
Clerk of the District Court for Dodge County, State of Nebraska

General Description

This Township (T 18 N. R 47 W) contains consid=erable good agricultural land. The bottoms of the North Fork of Platte River, which runs through this township, almost diagonally, from the North West corner to the S. E. corner of the township, are quite extensive, es=pecially on the North side of the river, where at the North West corner the bottom extends far over into the next township to the north. on the North side of the river the bottom is bounded on hemmed in by a line of high bluffs, containing ledges of lime stone these bluffs here rise like a wall, on the north side of the bottom to the height of 300 feet above the bottom along the river, but in the more eastern part of the township the rise from the river bottoms to the north is more gradual

In the South part of the township there is also plenty of lime stone, and that portion of the township is well adapted to grazing

The higher angle width of the river in this township is from 40,00 to 50,00 chains

its current is rapid and its bed is that of quick sands, yet in the months of June, July and August its channel is regular and deep enough to float ordinary river steam boats

November 7th 1872

General Description

In the S.E. portion of T. 20 N. R. 47 W. is a large quantity of plateau land, which is passable for agricultural and produces good buffalo grass

In the extreme N.E. corner of the Township the surface consists of low hilly drifted sand, the remainder of the township is of a rolling surface producing bunch grass principally. There is no water, timber or stone in this township

T. 21 N. R. 48 W. Contains a wide strip of plateau land running diagonally through it from the N.W. corner to the S.E. cor of the township, which is passable farming land, the S.W. part of the township is broken and contains plenty of lime stone with occasionally a brook of pure spring water, the N.E. part is of a rolling surface with bunch grass

List of Names

A list of the names of the individuals employed to assist in running, measuring or marking the lines and corners described in the foregoing field notes of townships 17, 18, 19 and 20 North, in ranges 47 and 48 West of the 6th Principal Meridian, showing the respective capacities in which they acted; Corson Harris, Chainman; Arthur L. Stahl, Chainman; Casper Yong, Axeman; J. W. Bowman, Flagman;

We hereby certify that we assisted Enos F. Gray, Deputy Surveyor, in Surveying the exterior boundaries of Townships No. 17, 18, 19 and 20 in ranges 47 and 48 West of the 6th Principal Meridian, and that said Townships have been in all respects, to the best of our knowledge and belief

well and faithfully surveyed
and the boundary
monuments
planted according
to the instructions furnished
by the Surveyor General.

Sworn to before me
Arthur L Stahl Chairman
Casper Gony. Foreman
J H Bowman Flagman

Lines circled and
sworn to by the
above named persons
before me, Clerk
of the District Court
for the County of Cheyenne
in the State of Nebraska
this 27 day of November 1872
T. Connell
Clerk of the District
Court for Cheyenne
County Nebraska

I Enos F. Gray, Deputy Surveyor do
solemnly swear that in pursuance
of a joint contract, wherein
Enos F Gray and John A. Hays
are joint Contractors with E. E.
Cunningham, United States
Surveyor General for the
District of Nebraska and Iowa
bearing date the 11th day of July 1872
I have well, faithfully, and truly
in my own proper person
and in strict conformity with
the instructions furnished by the
Surveyor General, the surveying
manual and the laws of the
United States, surveyed all
those parts or portions of exterior
lines as are represented in the
foregoing field notes as having
been surveyed under my direction;
and I do further solemnly
swear that all the corners
of said surveys have
been established and
perpetuated in strict

accordance with the Surveying manual and printed instructions, and that the foregoing, are the true and original field notes of such Survey

E. E. Gray
Deputy Surveyor

Subscribed by said Enos E. Gray, Deputy Surveyor and sworn to before me Clerk of the District Court for the County of Dodge, State of Nebraska, this 30th day of November 1872

J. J. Hawthorne
