October 1st 1866 —

General Description.

There is some good farming
land in this Township, the
best being on the North side
of the Elkhorn river; there
is also some very good timber along
the river, mostly on the North
side. The timber consists of
Cottonwood, Elm, Ash,
Willow and Boxelder, with
an undergrowth of Willow
Plum and Vines.
The bottom land is generally
too sandy to be well adapted
to cultivation. The Elkhorn
river in this Township is a
stream about 150 lks wide
and from 1 to 3 feet deep with
bright sand bottom, gentle
current water pure and
beautiful. Most of the swamp
land in the Township is too
wet for cultivation without
artificial drainage —
