General Description

This ~~This~~ Township lies wholly in valley of Platte River and is traversed by both branches. The bottom lands along the rivers are a rich alluvial soil producing vast ammounts of rich grass, and seems to posess the property of resisting continual ~~drouth~~ drought or unusual wet, The Union Pacific Rail Road passes through the township on the north side of South platte rendering it easy of access to Settlers. The climate is milder than in many places in the same Latitude and is very healthful. This Township is particularly adapted to grazing, and large herds of Cattle and Sheep are kept here both Summer and winter. No hay and no Shelter being necessary in winter
