Township 13 N. R. 36 W. 6th P.M.

General Description:

That portion of this Township lying South of Platte Valley is hard dry rolling prairie destitute of wood and water — The valley, for the most part, is good second rate Bottom land, much of it producing very heavy grass making it well adapted to grazing. That part North of Platte valley is a series of rough gravelly bluffs, very dry and worthless.

The Platte river and the Union Pacific Railroad pass through the Northern part of the Township

Township 13 N. R. 36 West.

The Platte river is a broad shallow stream swift current and very difficult to cross with teams.
The bottom land is impregnated with alkali to a considerable extent.

Township 13 N. R. 36 W. 6th P.M.

General Description

In this Township ~~is~~ the Land is better than in the Town of Range 35. as the hills on the South Side of the River end here, in a large Plateau on which the land is richer, and less sandy.

The hills on the North Side of the river are also considerably lower and contain many Springs of cold, clear water which make running Streams to the Bottom of River the Bottom Land is very rich and soil deep.

We hereby certify, that we assisted Charles Wimpey in Subdividing the Township Number 14 North of the Base Line and Range 36 West of the 6th Principal Meridian, and that said Township has been in all respects to the best of our knowledge and belief, well and faithfully surveyed and the boundary monuments planted according to the instructions furnished by the Surveyor General.
