General Description.

This Township is all prairie, and excepting the Platte valley is unfit for farming. The valley is generally fair, first and 2nd rate quality of Bottom land, generally dry and producing a good growth of grass for hay or pasture. The valley is well adapted to either grazing or Agriculture, barring the want of fuel and building materials that are necessary to the existence of the White man.

There is some Stone of a very inferior quality in the Township, mostly

on the North side of the valley in the Bluffs. The Union Pacific Railroad runs through this Township. So also does Platte river. Ogallala Station on the Union Pacific Railroad is in the South East quarter of Section 6.

July 20th 1871

Township 16 N. Range 38 W. 6th P. M.

Chains	General Description
	~~This~~ This Township is all Sand hills, quite barren, being thinly covered with tough grass. The Spanish bayonet grows abundantly on the tops and Sides of the hills, and a Small cherry brush abounds bearing a bitter cherry. In the South part of the Township there are several fine Springs of clear water, from which flow Small creeks running in a Southerly direction. This Township not adapted to cultivation, but would answer very well for grazing.
