General Description.

Middle Creek, which runs through the S. W. corner of this Township, is a rapid stream, from 2 to 4 feet deep - 50 to 100 links wide, with abrupt banks, from 20 to 30 feet high. Its Channel is over quicksands and mud so that it is difficult to ford.

It evidently overflows its banks in the wet season.

It is known to the inhabitants by the name of "Logan Creek".

Along its banks are small groves of timber - Oak, Cottonwood and Walnut being among the varieties. The bottom land through which it flows is from two to four miles wide & has an exceedingly fertile soil; some portions are dry enough for cultivation, while other portions could only be used for grazing and meadow.

At the time of surveying the entire bottom was covered with a dense growth of grass and weeds.

A belt of low land extends from near the N. W. Corner of the Township, about S. 30° E. until it inter-

sects the middle Creek bottom in Section 27. this belt is, in places, very similar to the bottom with which it connects.— in other places it is low and marshy.— It drains a considerable portion of the Township.

The streams in the N.E. part of the Township are pure and clear— issuing from numerous springs.

Aside from the bottom along Middle Creek, and the belt of lowland through Sections, 4. 5. 8. 9. 16 & 22, this Township is principally high, rolling prairie — with a good, 2nd rate soil.

It is roughest in the N.E. Corner.

The average amount of Charcoal deposited in the several mounds is Equal to a cube 2 x 2 x 2 inches, and it made up of one or more pieces.

A few of the 1/16 & 1/4 Section Corners have only two pits, while others are established with four.

Two parties were Employed in subdividing this Township;— the 1/4 Section lines having been run after the Section lines & at a different hour of the day.

We hereby certify that we assisted Theodore H Barrett, U.S. Surveyor, in surveying and subdividing that portion of Township Number 24 North of the Base line of Range number Eight East of the Sixth Principal Meridian, embraced within the Omaha Indian Reservation, and that said Township has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed. and the boundary monuments planted according to the instructions furnished by the Commissioner of the General Land Office.
